

TestGrid: Advanced Tests AL-AQ & BL-BQ

Overview

The ACER AL-AQ, BL-BQ tests assess general intellectual ability as demonstrated by the ability to see relationships and solve problems in verbal and numerical material. The tests place a higher level of demand on reasoning ability than the ACER Higher Tests PL-PQ and ML-MQ. It is aimed at students aged 15+ years at secondary and tertiary level, and adults.

The ACER Advanced Test AL-AQ (2nd edition) and Advanced Test BL-BQ are parallel forms of a group test designed to measure general intellectual ability at advanced secondary and tertiary levels

Two aspects of scholastic ability are measured: linguistic and quantitative

The tests are intended for use with graduates and superior adults. Age norms are provided for secondary school students. Graduate norms are provided for various government and corporate disciplines.

Reports

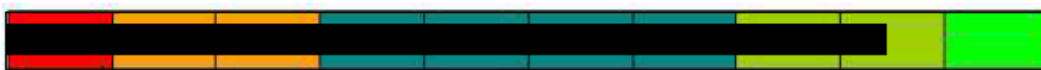

All the ACER Advanced AL/AQ & BL/BQ tests are integrated with TestGrid's Group Ranked Reports and TG's Shortlist Report with Interview Guide. The reports present the candidate's score as a percentile ranking and identify the level of ability they are likely to possess, the types of behaviours that can be expected, candidate suitability to certain role types, as well as where strengths and development areas lie. Behaviour based interview questions and development suggestions are also provided.

TestGrid creates one-stop online platform (*ShortList Oct 2006*)

Online assessment company TestGrid has created a one-stop-shop online assessment platform, which brings together "best of breed" recruitment, development and skills-based tests from a range of publishers. The platform currently has over 84 online assessments – covering the whole range of pre-employment and development tools including cognitive ability, skills-based, personality, emotional intelligence, survey, employee engagement and industry specific tools (such as safety and integrity tests). *It is designed to streamline the testing function, with the centralised platform allowing the delivery of a single candidate report which aggregates the results of multiple publishers.*
